Sylvie Vandenhoucke

Artist Statement

My work contemplates the dwelling between heaven and earth, the transcendental experience, and the sublime – how to make the invisible visible, how to dematerialise matter. The work reveals a non-physical or inner space, trapped between the layers of the miniature landscape.

One's understanding of the work alters radically with viewing distance and angle; orderly patterns slide into chaos, snow-like softness sharpens into angled fins, superficial marks deepen into vents, and changing light through a window unmasks lengthening patches of colour as shadow. The unfolding of the infinitesimal in the whole silently discloses this invisible nucleus of the work.
